### Bio-Security

This event is being conducted within an area where Hendra is present.

#### [DPI – White Park Horse Events: Biosecurity guidelines for organisers and competitors](#)

All event participants have a responsibility to maintain good biosecurity, and not put the health of other people's horses at risk.

Horses at events have the potential to spread infectious disease. Horse events act as multipliers for the spread of infectious diseases should an outbreak occur.

Horses that are suspected of suffering from infectious or contagious diseases or have been in contact with other animals suffering from such diseases **MUST NOT** be brought to horse events.

It is each owner's responsibility to ensure that they manage their own biosecurity risks. Visitors to the event should not touch any horses but their own. Clubs must limit the vaulters who have access to the stable to a minimum.

A horse Health Declaration must be filled out for each horse and presented upon arrival at the venue. This declaration will be made available through Nominate. Hendra vaccinated horses must present a current Hendra Vaccination Certificate.

Also remember that if your horse is not vaccinated against Hendra and becomes ill with any signs that suggest Hendra, the treatments available to that horse may be limited until Hendra has been ruled out.

The Organising Committee reserves the right to change or amend the schedule.
